

Scripture Index by Subject

A KJV quick-reference guide for investigating the principal biblical passages used throughout Kingdom Alignment Project studies.

How to use this index

Begin with the biblical passages themselves. The subject headings show how KAP organizes its research; they do not mean every passage independently proves the project's full interpretation. Read each text in context, compare related passages, and distinguish what Scripture states from the synthesis KAP builds from those texts.

Core Study Method

1. READ	2. DISTINGUISH	3. COMPARE	4. TEST
Read the entire passage in its immediate KJV context.	Separate persons, offices, speakers, locations, time periods, and actions.	Compare related passages without assuming identical terminology means identical office or administration.	Identify what the text states, what is inferred, and what belongs specifically to KAP's interpretive synthesis.

Reference Principle

This index is a doorway into study, not a substitute for it. A citation beside a KAP subject identifies a passage the project considers relevant; it does not mean the passage, standing alone, establishes every element of the KAP framework. The governing test remains the inspired Scriptures read in context and compared carefully.

All biblical references in this resource are keyed to the King James Version. Subject groupings and research-focus descriptions reflect the Kingdom Alignment Project's study framework.
